

# Mapping average racial and regional disparities across Bold Vision Domains

higher disparity     lower disparity

In LA County, youth experience the greatest racial and regional disparities when it comes to systems impact.

The color of the square shows how great racial and regional disparities are for each domain. Domains with **darker blue squares** on average have lower regional or racial disparities compared to other domains. Domains with **darker pink squares** have greater racial or regional disparities compared to other domains.

See [boldvisionla.org](https://boldvisionla.org) for definitions and methodology.
