

The foster care system is more likely to affect youth in the Antelope Valley more than any other region

Indicator: Children in foster care are defined as the average rate per 1000 youth ages 0-20 in foster care based on quarterly point-in-time counts. Probation data was not available by region. Data Source: Catalyst California's calculations of California Child Welfare Indicators Project, LA County Point in Time Counts for Foster Care and Probation, UC Berkeley, 2023.
