

# Mapping regional disparities across youth power systems in LA County

Youth in the Antelope Valley experience some of the highest disparities in contributors to youth power.

The color of the square shows how different youth outcomes are for each indicator. Regions with **darker blue squares** have better outcomes and smaller differences from the region with the best rate. Regions with **darker pink squares** have greater disparities from the region with the best rate.

See [boldvisionla.org](https://boldvisionla.org) for definitions and methodology.
