## Mapping regional disparities across healthy built environments in LA County

Youth in South and Metro LA experience some of the highest disparities in healthy built environments

| higher disparity lower           | dienarity                                      |         |          |                           |                          |           | Ballt erryll orlifterito |         |
